PLATFORM DEEP DIVE / Core components / Core extensions / Licensing

The License Engine is part of the core components of the

The fallback content to display on prerendering

. It is used for displaying reports regarding the usage of the platform in the

The fallback content to display on prerendering

.

It can be quickly deployed on the chosen infrastructure and then connected to the

The fallback content to display on prerendering

through

The fallback content to display on prerendering

events.

Let's go through the steps needed in order to deploy and set up the service:

» [License engine setup guide](#)

Multiple roles are available in the license engine, here are the steps for configuring them:

» [Configuring access roles \(old\)](#)
