BUILDING BLOCKS / UI Designer / UI component types / Root components / Container

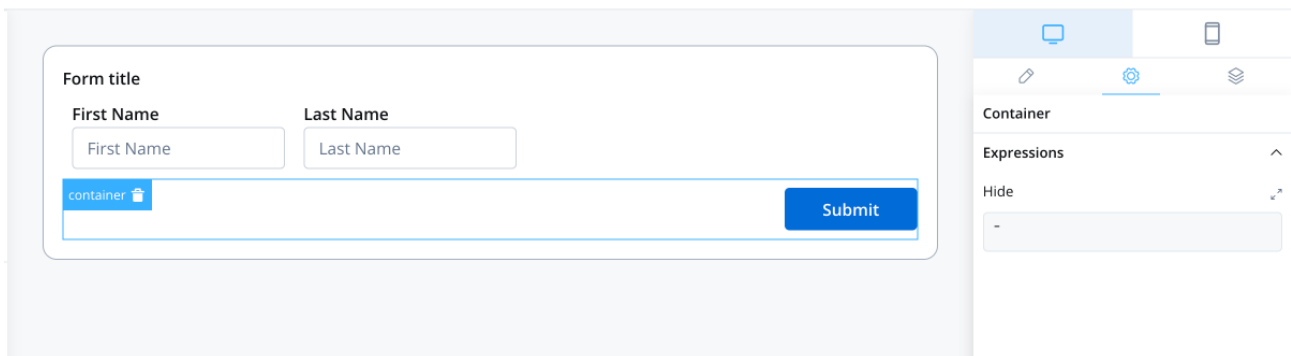

A container is a versatile element that allows you to group components and align them as desired.

The following properties can be configured in the container:

Settings

- **Expressions (Hide)** - JavaScript expressions used to hide components when they evaluate to true

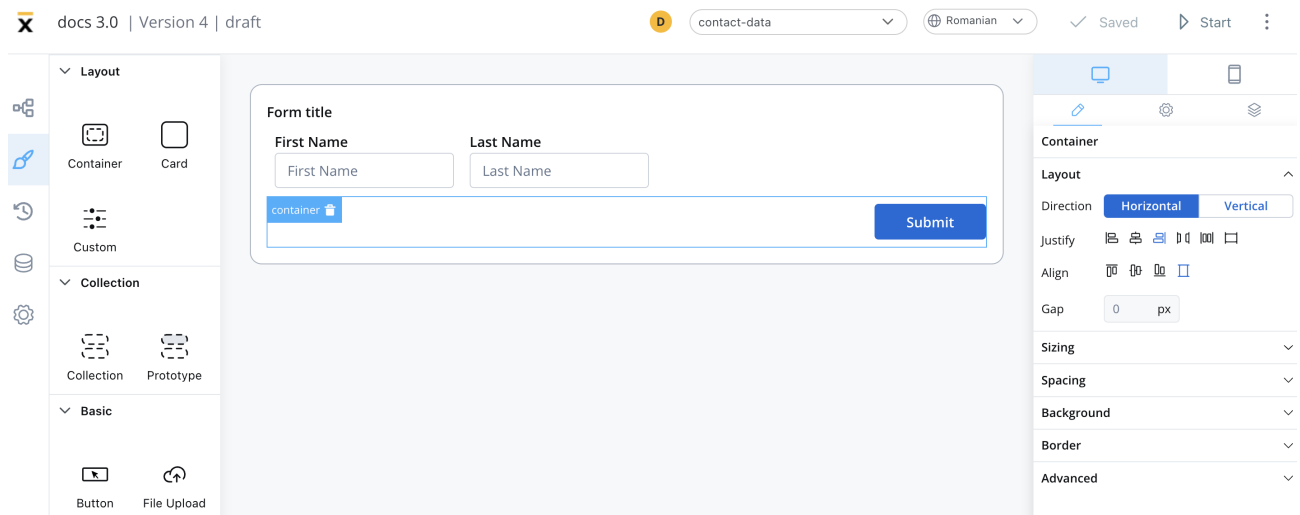

Styling

- **Layout** - this property is available for components that group children and includes the following options:
 - Direction - Horizontal / Vertical (for example, select *Horizontal*)
 - Justify (H) - (for example, select *end*)
 - Align (V) - this option allows you to align components vertically
 - Gap - you can set the gap between components

More layout demos available below:

» [Layout Demos](#)

When you apply the above properties, you can generate the following output, with the button appearing on the right side of the container, underneath the form with three form elements:

For more information about styling and layout configuration, check the following section:
