FIOWX.AI DESIGNER / What is the FLOWX Designer?

FLOWX Designer is the FLOWX.AI no-code visual development environment. It allows users to create web and mobile applications without having to know how to code.

With the FLOWX Designer, you can:

- Develop
The fallback content to display on prerendering based on **BPMN 2.0**
- Configure interfaces for the processes for both generated and custom screens
- Define
The fallback content to display on prerendering and validations via **DMN** files or via **MVEL**, or using other supported scripting languages
- Create integration connectors in a visual manner
- Create
The fallback content to display on prerendering for your applications
- Adding new capabilities by using **plugins**
- Manage users access

This section will go through the steps to set up the

The fallback content to display on prerendering and how to use it.
