FIOWX.AI DESIGNER / Managing a process flow / Creating a new process definition

The first step of defining your business process in the

The fallback content to display on prerendering is adding a new process definition for it.

This should include at least one START and END node.

Steps for creating a new process definition

To create a new

The fallback content to display on prerendering .

1. Open

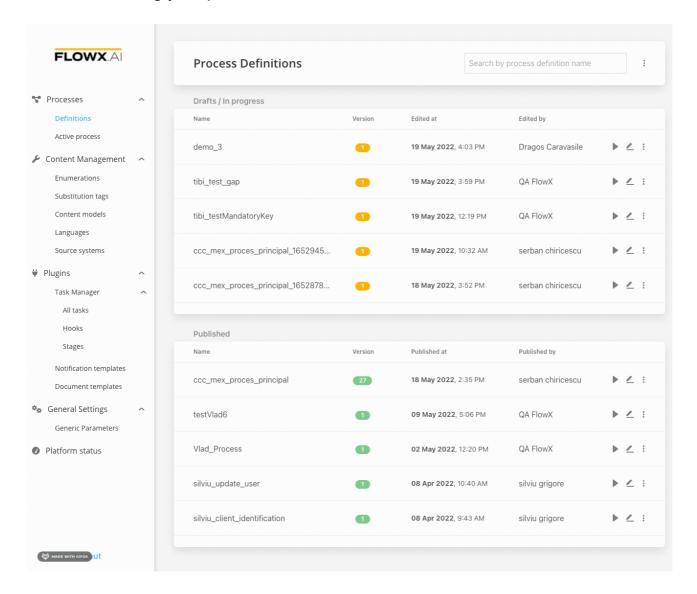

The fallback content to display on prerendering and go to the **Definitions** tab.

2. Click the **New process** button, using the **breadcrumbs** from the top-right corner.
