 PLATFORM SETUP GUIDES / License engine setup guide / Configuring access rights for License

## PLATFORM SETUP GUIDES / License engine setup guide / Configuring access rights for License

Granular access rights can be configured for restricting access to the License component.

The following access authorizations are provided, with the specified access scopes:

 Manage-licenses - for configuring access for managing license related details

## Available scopes:

- read users are able to view the license report
- edit users are able to update the license model and sync license data
- · admin users are able to download the license data

The License component is preconfigured with the following default users roles for each of the access scopes mentioned above:

- manage-licenses
  - o read:

© FLOWX.AI 2023-07-26 Page 1/3

- ROLE\_LICENSE\_MANAGE\_READ
- ROLE LICENSE MANAGE EDIT
- ROLE LICENSE MANAGE ADMIN
- edit:
  - ROLE\_LICENSE\_MANAGE\_EDIT
  - ROLE LICENSE MANAGE ADMIN
- o admin:
  - ROLE LICENSE MANAGE ADMIN

These roles need to be defined in the chosen identity provider solution.

In case other custom roles are needed, you can configure them using environment variables. More than one role can be set for each access scope.

To configure access for each of the roles above, adapt the following input:

SECURITY\_ACCESSAUTHORIZATIONS\_AUTHORIZATIONNAME\_SCOPES\_SCOPENAM E\_ROLESALLOWED: NEEDED\_ROLE\_NAMES

Possible values for AUTHORIZATIONNAME: MANAGELICENSES.

Possible values for SCOPENAME: read, edit, admin.

For example, if you need to configure role access for read, insert this:

SECURITY\_ACCESSAUTHORIZATIONS\_MANAGELICENSES\_SCOPES\_READ\_ROLES/ROLE\_NAME\_TEST
