IAM solution

> ⚠ **INFO**
>
> Superset is using be default flask-openid, as implemented in flask-security.

Superset can be integrated Keycloak, an open-source identity and access management solution. This integration enables users to manage authentication and authorization for their Superset dashboards.

» Configuring an IAM solution

Prerequisites

- Keycloak server

- Keycloak Realm

- Keycloak Client & broker configured with OIDC protocols

- client_secret.json

- admin username & password of postgres instance

- Superset Database created in postgresql

- optionally Cert-manager if you want to have SSL certificates on hostnames.
