# BUILDING BLOCKS / UI Designer / UI component types / Root components / Container

A container is a versatile element that allows you to group components and align them as desired.

The following properties can be configured in the container:

Settings

- **Expressions (Hide)** - JavaScript expressions used to hide components when they evaluate to true

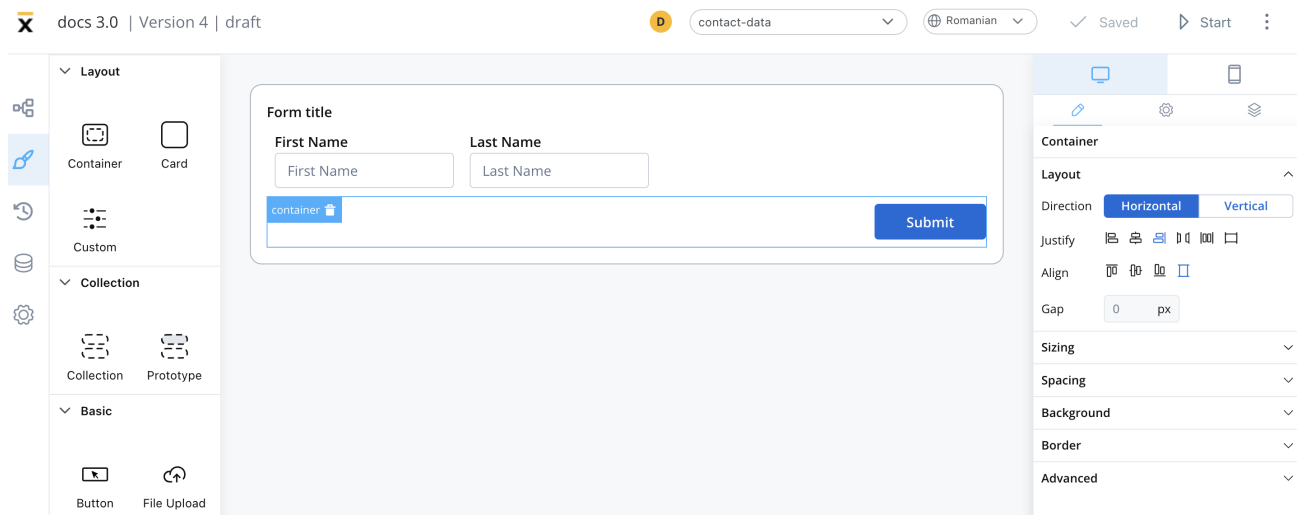

Styling

- **Layout** - this property is available for components that group children and includes the following options:

  - Direction - Horizontal / Vertical (for example, select *Horizontal*)
  - Justify (H) - (for example, select *end*)
  - Align (V) - this option allows you to align components vertically
  - Gap - you can set the gap between components

More layout demos available below:

» Layout Demos

When you apply the above properties, you can generate the following output, with the button appearing on the right side of the container, underneath the form with three form elements:

For more information about styling and layout configuration, check the following
section:
