PLATFORM DEEP DIVE / Core components / Core extensions / Content management / Source systems

If multiple

The fallback content to display on prerendering
values are needed to communicate with other systems, source systems can be used.

On the main screen inside **Source systems**, you have the following elements:

- **Code** - not displayed in the end-user interface, but used to assure value uniqueness
- **Name** - the name of the source system
- **Edit** - button used to edit a source system
- **Delete** - button used to delete a source system
- **New** - button used to add a new source system

Adding new source systems

To add a new source system, follow the next steps.

1. Go to

    The fallback content to display on prerendering

    and select the **Content Management** tab.
2. Select **Source systems** from the list.
3. Fill in the necessary details:
    - Code
    - Name
4. Click **Add** after you finish.
